Hi,

I have constructed my version of Xiaomi Mijia Bluetooth Thermometer Hygrometer bracket for my SAMLA drybox. It is also compatible with cheap popular chinese noname thermometer/ hygrometer. Just print, use double-sided tape and stick it on the drybox wall. You can also stick it on wall or where you need, because bracket is double sided.

On the bottom side of bracket is hole for thermometer sensor.

I printed it from PLA without supports, MK3S+.

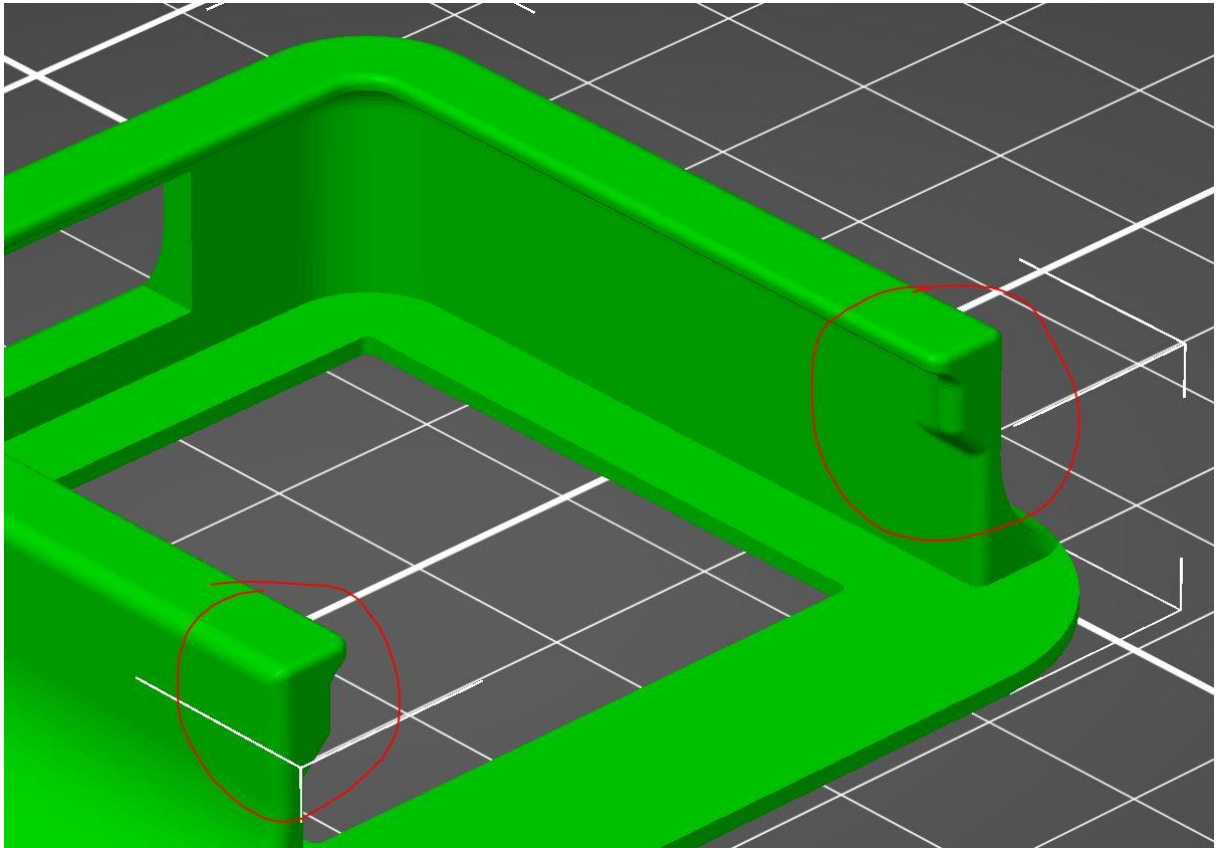

Layer 0.15, infill 20%.

Happy printing :-)

Edit - Version 2 (file Xiaomi_Thermometer_Hygrometer_V2):

fmarx1_762273 had a very good comment. When placing the holder horizontally (from below on the lid of the SAMLA box), the thermometer fell out when the box was opened. I made minor changes to the design:

I added small locks so that the thermometer fits into the holder and does not fall out
