Summary

An alt version of the base model with the door opening removed so it would be larger

[Household](#) > [Outdoor & Garden](#)

Really nothing too special, the original model has a house part and a base part, the base part has a little wall that makes the 'door' a bit smaller. If you try to scale the model to make it a bit larger than you might want to have the little wall from the original removed. This is a file for that that I thought I'd upload so if I need it again I'd be able to find it.

You will still need the top part from the original other parts from @MrMegaTronic_99635

This remix is based on

the American Craftsman Bungalow Birdhouse
