updated 30. 7. 2023 | published 30. 7. 2023

Summary

Remixed to be an interference fit.

[3D Printers](#) > [3D Printers - Upgrades](#)

@Eric_Recheck ones were great but I found that they were a loose when fitted and so these remixed ones are an interference fit and will not rattle.

This remix is based on

Mk4 Z axis dust or debris cover

by Eric
