Hi there,

I have a smart home and I like controlling my devices via my phone.

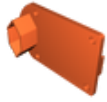

But I don't like broken SmartHome devices. Mine had a little incident with the floor, fell from a rather high place and broke.

So I designed a back cover my switch and now everything is working again.

Many of you won't know where this product is from, thats because the company is switzerland based and only sold in switzerland. They built Smart Powerplugs 2 years before Hue implemented their own version.

enjoy
