updated 30. 7. 2023 | published 30. 7. 2023

Summary

Added a cutout for a switch on the side and adjusted the holes for Ruthex threaded inserts.

Remix of TTF good Bentobox design. All credit to him and a huge thanks for releasing the step file for this so I can add a switch. Opening measures 20.5 x 14. I have also changed the holes so that Ruthex M3 inserts fit.

This remix is based on

**BentoBox v2.0 Carbon filter for Bambu Lab X1C,
enclosed P1P & Voron Trident**
