Summary

This is a print in place plate stand suitable for painted stones too.

[Household](#) > [Home Decor](#)

Tags: [plate](#) [stone](#) [stand](#)

The painted stones, especially those heavy ones are usually arc shaped and common plate stands have no chance to hold it in position. This is the reason i made this positionable plate stand.

I printed it from PETG and PLA. Both materials works verry well. Of course the position aretation mechanism is not designated for a lot of moves, rather it is for strength and heavy stones then.
