A miniature of a wash moving-head

For an authentic style, print the head, base and arm in black and the led's in transparent. if you do not have a multi-material printer, print the head with no lib, and change the filament, when it comes to the led's. the lib can be printed separately and glued on, or just left out.

If you have a multi-material printer there is a version with the led's separated.

This remix is based on

LED Wash Moving Head lighting fixture
