### Summary

Hold cable. Uses glue.

[Household](#) > [Office](#)

Tags: [holder](#) [hook](#) [cable](#) [desk](#) [loop](#)

I wanted to print the original, but only gcode was provided... I will not print a gcode, because then i am stuck with the settings of the creator.

I dont even understand why not include a damn stl in the first place.

I designed my own from scratch with inspiration from this, hence i am uploading as remake. Hopefully people will find it useful.

I include stl as well as step if anyone interested.

This is a brand new model, i designed it!

Use 3M VHB glue, it so damn strong and does not leave a trace. Not everyone knows so i mention you need to clean the surfaces for best performance.
