Stanley FatMax FMST1-75779 Shallow Organizer Lid for the small bins

This lid exists, to prevent small washers to move to another bin.

I used a 0.2mm layer height with a 0.4mm nozzle and printed in PLA

Print with the top of the lid on the printbed. No support is needed.

Included is the f3d file

The lid can be used with a [short divider](#) or without.
