Summary

TPU bands for AE 28th scale drift style!

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [rc](#) [drift](#) [rctruck](#)

These bands can be slid over the tires on Associated SC28 to add even more fun to an already righteous rc truck.

Printed in TPU at 0.3mm layer, they're just thick enough for two perimeters with 0.4mm nozzle. Could be scaled for bigger cars, but haven't tried it yet.... Could also use another material, but might be too slick and difficult to install without perfect sizing.

Enjoy!
