Summary

Designed for laptops 14" or smaller, this brings the display to eye level.

Tags: [laptopstand](#) [tabletstand](#)

Designed for laptops 14" or smaller, this brings the display to eye level. Also works nicely for desk-side tablet viewing. Maximum thickness for the base is 15mm.

Obviously needs a laptop with a display hinge that can open wide (like most Thinkpads X/Yoga series, as pictured).

Sturdy design despite the compact footprint. And yes, it can be typed on.

Print instructions

With 3 perimeters@0.4 nozzle, 0.2 layers, 20% infill will hold securely up to 1.5Kg with very little flex.
