Summary

Tomorrowland led sign

[Art & Design](#) > [2D Plates & Logos](#)

Tags: [led](#) [ledlight](#) [tomorrowland](#) [ledsign](#)

Best to use black en white PLA for the best result, but other colors are possible.

Load the TMLBlack and TMLWhite files as a single object an flip it with the logo faced to the bed.

Don't forget to buy me a beer :)
