Tags: [storage](#) [desk](#) [headphones](#) [design](#) [fusion360](#)

A simple and aesthetically pleasing wall mount headphone holder for your trusty cans :)

Fits up to 50mm band (HyperX Cloud Alpha Wireless shown in pics).

Prints with no supports and looks great even at 0.25mm layer height - I printed 0.25, 8% infill, 2 walls in just over 1 hour.

Requires 2 small screws with max thread width 3mm / head 6mm.

I've included a screw cap model too, printed in the same layer height these snugly push fit into the hole for a clean look** ;)

Designed in Fusion 360, printed as shown here on Mini+.

****YMMV** of course - tweak the size by 1% or so if you're not so lucky, or use some double sided/tacky stuff to hold in place if too loose

Filament in pics: eSUN Milky White (Matte)
