Converts rechargeable CR123A batteries to 223 for use in 35mm film cameras.

This is not a commercial product and I made this for my own personal use, I've made it available for others should anyone wish to use this or build off my idea.

Tested with my Ricoh R-110Z Super 35mm point-and-shoot film camera.

Updated from my dumb 2 part design to a single printable part.

battery contacts I use:
