## Summary

I created this to showcase concert tickets

[Art & Design](#) > [Other Art & Designs](#)

Tags: [stand](#) [displaystand](#) [display](#)

I designed this for a wedding gift to present concert tickets. In the upper part there is a gap to slide the cards in. I have removed the names from the pictures so that everyone can freely customize it.

I downloaded the guitar and added it in Prusa slicer as negative volume first. I then printed it 1% smaller than the negative volume.
