Summary

A quick fix to support the antenna on my drone.

Tags: [thingiverse](#)

A quick fix to support the antenna on my drone. it will print best with rotating the supports to be flat on the print deck, face down if you will. I used a raft of 3, "face" down and increased the size to 1.5

Added second variant that works better for my other drone. This one is trickier, good luck!

Print Settings

Printer:

generic prusa mendel

Rafts:

Yes

Supports:

No

Resolution:

0.1

Infill:

15%

Notes:

rotate to face down and "lay flat" to print. The raw file prints small, so print it at 1.5 or size for your needs
