Thank you for supporting me!

This is another free 3D model made available for you. I love sharing my models, but designing, testing, polishing, uploading and maintaining them is a lot of work. In case you enjoy this model, please leave a small [Donation](#) or [Buy me a Coffee](#). Thank you!

Design

Do you hate the black/grey drain screw as much as I do? I can't help, but once it is getting dirty / sandy, it is really hard to open... So I designed this wrench allowing top open / close Valterra 3" termination cap with a bayonet hook really easy.

As an option, it includes holes for four screws / pins to open the tube compartment next to our Airstream's black/gray drainage. See the video to understand how the wrench works for both.

Printing

Designed to be printed using a 0.4mm nozzle and 0.20mm layers, PETG. Using a good PETG, this can be printed with pretty much the standard settings. No additional perimeters or infill needed. The print doesn't require supports either.

Printing service

I offer this part (including metal pins) at these prices:

- Germany: 17,50 EUR incl. insured shipping as a parcel
- European Union: 18,50 EUR incl. un-insured shipping
- United States of America: 25 US \$ incl. un-insured shipping

Local customs may charge you an additional fee and VAT.

Colors available currently: black, white, red, Dutch orange
