This is a 3D design of a stainless steel rectangular tray available through eBay and AliExpress (with the magnets removed). The tray dimensions are 136.5mm by 54mm at the base and 13.5mm high with tapered sides. The tray has a brim which takes the outside dimensions to 146.25 x 64.25mm.

The design is intended for metal fabrication, though a test model can be produced via a 3D print in plastic.

My print is made in PETG 1.75mm 3DFillies silver filament, with 0.2mm layer height and 100% infill on a PRUSA I3 MK3S printer.

I hope you can find this design useful, too.

Remember to leave me some feedback or even a tip to keep me enthused to make more of these drawings.

## Print instructions

The design is intended for metal fabrication, though a test model can be produced via a 3D print in plastic.

My print is made in PETG 1.75mm 3DFillies silver filament, with 0.2mm layer height and 100% infill on a PRUSA I3 MK3S printer.
