Summary

Custom-made support for VKB Gladiator NXT

[Gadgets](#) > [Video Games](#)

Tags: [vkbgladiator](#) [vkb](#)

This is my custom-made support for VKB Gladiator NXT. It uses some M6 screws and a simple clamp to fix the support to the desk.

There are 2 types of alignment parts:

- The straight one, to ensure the support is perpendicular to the desk
- The angular one, to have an angle of 28 degrees.

The small plastic bolt is there because everything has been designed to work with M6 screws, but latest Gladiators have 5mm holes in their plate. So you can make the hole larger or your can print these bolts which have the dimension of a M6 bolt with a M5 hole ^^
