

Motoblitz Talon and Katana adapter

Zharathos

[VIEW IN BROWSER](#)

updated 16. 4. 2024 | published 16. 4. 2024

Summary

An easy to print adapter for the Nerf Motoblitz

[Toys & Games](#) > [Other Toys & Games](#)

Tags: [nerf](#) [nerfmod](#) [talon](#) [katara](#) [shortdart](#) [motoblitz](#)

This adapter was remixed from the tungstenexe mag adapter, that was only compatible with the Nerf Stryfe, in order to make it compatible with the Motoblitz.

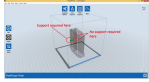

For the printing Instruction refer to the [original page](#) of the model.

I used my [hybrid pusher](#), but you can try the [roboscout64](#) one but i couldn't test it due to a unexpected different stock pusher.

Update 16/04/2024:

Added chamfers in the pusher channel in order to make the trigger pull smoother.

This remix is based on

Talon and Katana mag adapter for Stryfe ONLY

by tungstenexe
