A 1x2x6U Gridfinity storage container for tap tool bits.

This is based on the following tap tool set from Amazon: <https://amzn.to/3O7eA6N>

Note that the model I uploaded is slightly different than in the printed version in the photo: the text is a bit larger (since it didn't come out great) and the M8 tap hole is slightly raised, for a more pleasing look.

This is based on the [Gridfinity](#) organization system by Zach Freedman.
