## Summary

An insert for the danish cookie tin (always) used for storing sewing kit. Helps organize all the threads and tools!

## Danish cookies tin insert/organizer

An insert/organizer for the widely used danish cookies tin to store the sewing kit items. Fits a bit loose on the tin because it needs to pass the edges when inserting it, but works perfectly.

- The middle compartment is the right size to store threads in the floss-like spool
- A small compartment is great for adding some fabric and storing needles
- Big compartment fits a sniper or small scissors
