This is the second version of my headset holder. One time I was searching online for something to hold my headset, but I couldn't find anything that would either fit on my printer or was cost effective on filament. I came up with this design to attach to my adjustable Husky table for my headset to hang from. As of me writing this I have designed two versions, and this is the first one I designed. I'm currently using my newer one while the first one is being used as a trash bag holder.
