Summary

Mount device for mXion FCC DCC decoder

[Toys & Games](#) > [Other Toys & Games](#)

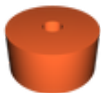

Easily clip your G scale items with this mounting device for a **mXion FSD DCC decoder**: Screw the holder e.g. into a building etc. (use the optional spacer where required). The decoder is simply clipped in and can be removed for maintenance (no double-sided adhesive tape or hot glue required which both makes a mess in case the decoder needs to be removed).
