I have two kids and one is in college and the other soon to be. I designed this coaster to hold a cup from each university proudly on my desk at work. You can too! Or to hold two of your most favorite cups.

Print instructions

I have created the gcode as it requires some top layers to be open and others to be closed. The gcode is generated to be used on my MK3S but I have included the stl file for other types of printers.
