Summary

The Waves lift the simple pegs to a hole new challenge. Fast and Easy to print, install and have endless possibilities

[Household](#) > [Pets](#)

These waves make it way harder to get to the food. Why not straights? I Tried them. They are boring and do not change the difficulty for your cat at all...

As Always:

My cat is rather small (3kg) so you eventually need to scale the pieces in slicer up:

- original size for cats up to 4kg
- 120% for cats up to 6kg

The playing board for Cats aims to make it very easy to enrich your Cats Life. It is highly customizable, as the Base parts are very easy to Print and Remix from. It can expand unlimited and the standard tiles are

small enough to fit even a Prusa Mini with ease. The big tiles however do only fit the MK3s printer and other larger printers.

Here is the Link to **all of the different Remixes** created over time to entertain your Cat(s):

<https://www.printables.com/social/29398-magda-j/collections/157491>

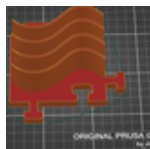

Print settings:

- layer height: 0.3mm
- support: no
- infill 10%

If you have more than one cat I would suggest to make **more smaller boards** instead of one big one. They do not need to be identical. This keeps your cats interested and everyone has a chance to try it out.

If you need further information, have ideas for new pieces, etc... please let me know. I love feedback and also I do really enjoy pictures of your makes if it includes your cat ;)
