[lens](#)

Nikon 52mm lens cap holder for a 12mm Nikon camera strap.

The holder is really light at only 3.6 grams. It may feel a bit flimsy but that's the point. It's a bit flexible until the cap is on it.

Printed on a well-tuned printed so you may need to make small adjustments to make it fit perfectly.

My print details

Feature	Detail
Printer type	FDM
Material type	PETG (PLA also works fine)
Nozzle	0,4mm
Layer height	0,12mm
Infil	20%
Bed adhesion	Skirt
Supports	No
Scaling	Scale as needed

Post-processing + Extra parts

- Nothing

Tips & tricks

- Scale only in X & Y to make it fit. The inside diameter should be 51mm.
