### Summary

I made this wheel cover for my bosses racing team so they could mount the buttons in a different spot

I made this cover for my bosses racing team so they could mount the buttons in different places. there is also a backing plate with several holes to run the button wiring through. Id print it in ASA or ABS if your going to use it in a IRL car or PLA is fine if you are using it on a sim racing wheel indoors.... Ive also included the sldprt file hopefully someone creative can do something cooler with a mini spotting screen or something neat.
