I created this base for my sister's drawing tablet, it answers 3 pain points:

- Have a thicker/supportive edge where she could more easily rest her hand
- Keep the pen always at hand in a nice, accessible position
- Be reversible as she changes positions often

Printed with:

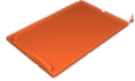

- Sovol SV06
- PLA
- Layer height: 2mm
- First layer speed: 20mms - I recommend slowing down since this is a relatively thin base
- 20% infill - I definitely didn't need this much, but I was learning
