Summary

Add a shoulder strap to M18 fan without modifying or altering the fan housing.

Mounts allow addition of a shoulder strap for carrying Milwaukee Tool M18 portable fan.

Print one L and R or two R mounts. I printed both mounts in nylon for heat resistance.

Recommend adding mount to left side first. The upper T15 screw must be removed and four lower T15 loosened to install. The 1mm step faces the red fan body.

Watch for **electrical wires** when adding mount to right side.
