Got a cat? Or maybe a dog? If they love automatic laser machines but keep knocking them over, this may help you get it out of their reach.

No pet? It's still a handy circular wall shelf for anything else you need. Its designed for a 70mm circular object but I designed it to 74mm just for tolerance's sake.

Print with the flat screw-hole side facing down, circular shelf going straight up into the air.

Cat laser toy in pictures (no affiliation to me):
