## Summary

Badge I made.

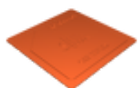

[Art & Design](#) > [2D Plates & Logos](#)

I recently passed the EC Council CHFI certification exam, and to celebrate, I 3D printed my own badge! The badge is a replica of the official CHFI badge, It's a great way to show off my certification, and it's also a fun conversation starter.

I'm sharing the STL file for the badge so that other people who pass can print their own.

I hope you enjoy printing your own CHFI badge! Congratulations on passing the exam!"
