Here's my proxy model for Render! He's a big angry sasquatch looking critter with brown fur, big claws and terrible teeth... so here you go!

As always, the .blend file and pre-supported .3mf (including the one that I used to print this on my Prusa MK3, although the support points should work for SLA printers) for this model are available to my patrons at <https://patreon.com/VirtuallyJason>. If you appreciate my work and have a few dollars to spare each month, please consider joining!
