### Summary

A friend of mine broke his second golf ball retriever and was complaining that it always broke in the same spot.

Tags: [retriever](#)

A friend of mine broke his second golf ball retriever and was complaining that it always broke in the same spot.

I designed and printed a replacement part, with a beefier section where the telescopic handle connects.

The tolerance is important as it must not be too tight where the metal handle is inserted into the replacement part. The first version split due to a too tight fit and the plastic fibre orientation.
