This is a discsander faceplate for woodturning lathes. Put some self-adhesive velcro on it, punchout the holes (or don't), screw it on your favorit lathe, put some sanding paper on it and start sanding!

I created and tested the M18x2.5, 150mm, 6 hole version. This version should fit woodturning lathes like:

- Güde
- Scheppach DM600VARIO, Scheppach DM1100T
- Einhell TC-WW 1000/1

Printed with PLA, 0,6mm nozzle, 3mm walls and 3mm top and bottom. So far its working great.

I also uploaded a M33x3.5, 150mm, 6 hole version. Could not test it so far.
