### Summary

Camera mount for the Creality CR-M4 printer

[3D Printers](#) > [Accessories](#)

Tags: [cameramount](#) [creality](#) [generativedesign](#) [crm4](#)

This is a camera mount I designed using generative design in Fusion 360 to hold a generic 1/4 mount camera for the CR-M4. It uses the screen hardware to mount. Designed if you have Klipper running on the printer since you don't need the screen anymore. While it may look flimsy, it is designed to hold 20 pounds of force thanks to generative design modeling.

Print with supports.
