## Summary

Vibration Isolator for Prusa MK3 and MK4 3D-Printer

[3D Printers](#) > [3D Printers - Upgrades](#)

Tags: [3dprinter](#) [prusai3mk3](#) [prusai3mk3s](#) [lowprofile](#)  
[vibrationfeet](#) [vibrationisolation](#) [prusamk4](#)

This low profile vibration isolator reduces the transmission of vibrations to the table top and lowers the noise significantly.

It is easy to print, space-saving and inconspicuous. The vibration isolating feet lift the printer only a few mm.

It fits on Prusa i3 MK3/MK3s/MK3s+/MK4.

I made good experience with PETG (0.2mm layer height, 100% infill).
