Replacement for the Osprey Exos Backpack (and likely other models) breast / upper **belt connector**. Unfortunately it is possible to lose the breast belt since they are connected in a "button like" manner. After I couldn't find replacement parts from the original vendor (and I have a 3D printer ;)) I decided to build my own replacement parts and make them available for all who share my fate.

Attached .gcode is a slow quality print with 100% infill for maximum durability.
