### Summary

A very cheap wireless speaker for your phone

[Gadgets](#) > [Audio](#)

Tags: [wireless](#) [bluetoothspeaker](#) [speaker](#)

I made this wireless speaker from speakers from inexpensive computer speakers, used the cheapest PA1002 amplifier and the Vhm314 Bluetooth module, the speaker is powered by a built-in 18650 battery, and is charged through the tp4056 module, I am completely satisfied with the sound of the speaker.
