### Summary

Subaru Model BRZ

[Tabletop Miniatures](#) > [Vehicles & Machines](#)

Tags: [interior](#) [car](#) [subaru](#) [toyota](#) [scion](#) [brz](#) [gt86](#) [frs](#)  
[coupe](#) [sportscar](#) [subarubrz](#) [gr86](#)

Very detailed model provided by [MAX\\_MR\\_](#) of the 2014 Subaru BRZ. This model features interior details such as seat, steering wheel, vents, and cup holder! Original model likely requires some manipulation to print as the outer body is a thin solid. I found blender easiest to manipulate the original model.

In the “Exterior” model, I removed all of the interior details so that it would print on SLA printer (scaled to 1/64). Your mileage may vary.

### UPDATE 10/27/2023

I've been busy working on this model! I did a bunch more work to try and fix some of the issues with printability. I completely overhauled the tire/wheel so that the ribs are correct. I connected the hood and other body panels to form a solid 3D body. (I'm not the best with blender, but I did

what I could.) I then used NetFab to clean up all the issue I couldn't figure out. The following files are new:

- Subaru BRZ 2014\_Exterior.blend (my working blender file)
- Subaru BRZ 2014\_Exterior\_v2.stl (NEW fixed STL)

The screenshot does not show supports (though you will definitely want to print with them) so you can see the vast improvements to the model.
