The Cute Frog Cable Holder has two cable notches:

one is **3mm**, and the other one is **4.5mm**.

It's a **print-in-place** design, which means you don't need any support material or assembly. Just print it and enjoy!

You can use them to organize your cables and keep them from tangling. The frog also has a cradle for your phone that measures **1.5cm by 8.4cm**.

You can place the **official Apple Wireless Charger** inside the frog to wirelessly charge your iPhone or AirPods, for example.

Under the frog, there is a **3cm diameter placeholder** to place an optional 2mm (and up) gel pad or double-sided pad.

The model features are already separated by colors. You can easily customize the frog's appearance by changing the filament colors or using different materials.

Make sure you do not have an elephant foot (the first layers squished too hard into the bed); otherwise, the hinge nor the Apple Wireless Charger placeholder will work.

I hope you like this cute and useful design. Thank you for your attention, and happy printing!
