### Summary

This is an alternate rear crossmember for the jeep designed by Eficker it deletes the tail lights and adds D-ring mounts

[Hobby & Makers](#) > [RC & Robotics](#)

Tags: [tamiya](#) [scale](#) [14thscale](#) [rcsemi](#)

I wanted my lowboy to not have the tail light mounts primarily to make it simpler than the original. I also wanted to have some D-ring mounts for it to improve the heavy transport idea.
