Tags: [rocket](#) [rocketry](#)

The Starbust mini RC rocket, created by NebulaB Aerospace, is an innovative and exciting addition to the world of remote-controlled flying. This rocket is designed to be printed in place, which means it can be easily assembled by the user and launched in no time.

With a height of up to 280m, the Starbust is capable of soaring to impressive heights, providing an exhilarating flying experience for its users. It can reach speeds of up to 470Kmh, making it a fast and agile rocket that can keep up with the most demanding users.

The Starbust uses a Klima C6 – 5 motor, which is a powerful and reliable motor that ensures smooth and efficient rocket propulsion. This motor provides the necessary thrust to propel the rocket to its maximum height and speed, making it an excellent choice for anyone looking for a high-performance RC rocket.

Overall, the Starbust mini RC rocket is a must-have for anyone who loves flying and wants to experience the thrill of launching their own rocket. With its impressive height and speed capabilities, as well as its easy-to-

assemble design, the Starbust is sure to provide hours of fun and excitement for users of all skill levels.

Video of the launch: https://www.tiktok.com/@nebulabaerospace/video/7259019430611537179?is_from_webapp=1&sender_device=pc&web_id=7225306711509698074

What do you need:

- Motor Klima C6 - 5: <https://tinyurl.com/32x4f7pa>
- 4 toothpicks

Build:

1. Print the rocket
2. Insert the motor
3. Insert the toothpicks into the wings to make space from the ground
4. LUNCH IT!

We are not responsible for anything that happens while using this rocket!

Happy flight!
