Summary

This drawer to makes use of that useless cubby adjacent to the radio on the Ford Maverick. Press fit, no velcro needed.

This drawer is designed to make use of that pointless cubby to the right of the Ford Maverick radio display. This fits snug in the cubby hold, making use of the ledge near the outside to hold it firmly in place. The drawer holder does not require any support at all. The drawer itself will probably need supports on the overhangs unless you have a printer that handles overhangs really well. The drawer stays closed on its own, however, I did wind up putting a couple of magnets on mine, just so it snaps closed with a satisfying 'thunk'. In this remix, I added the FITS slot by Rob S. to the front of the drawer so you can attach your favorite accessories.

This remix is based on
