updated 26. 10. 2023 | published 26. 10. 2023

## Summary

I hope you like this model of a Star wars Jedi interceptor. That took me a long time to make, but the time was worth it.

### Printing:

Layer height: **0.10**

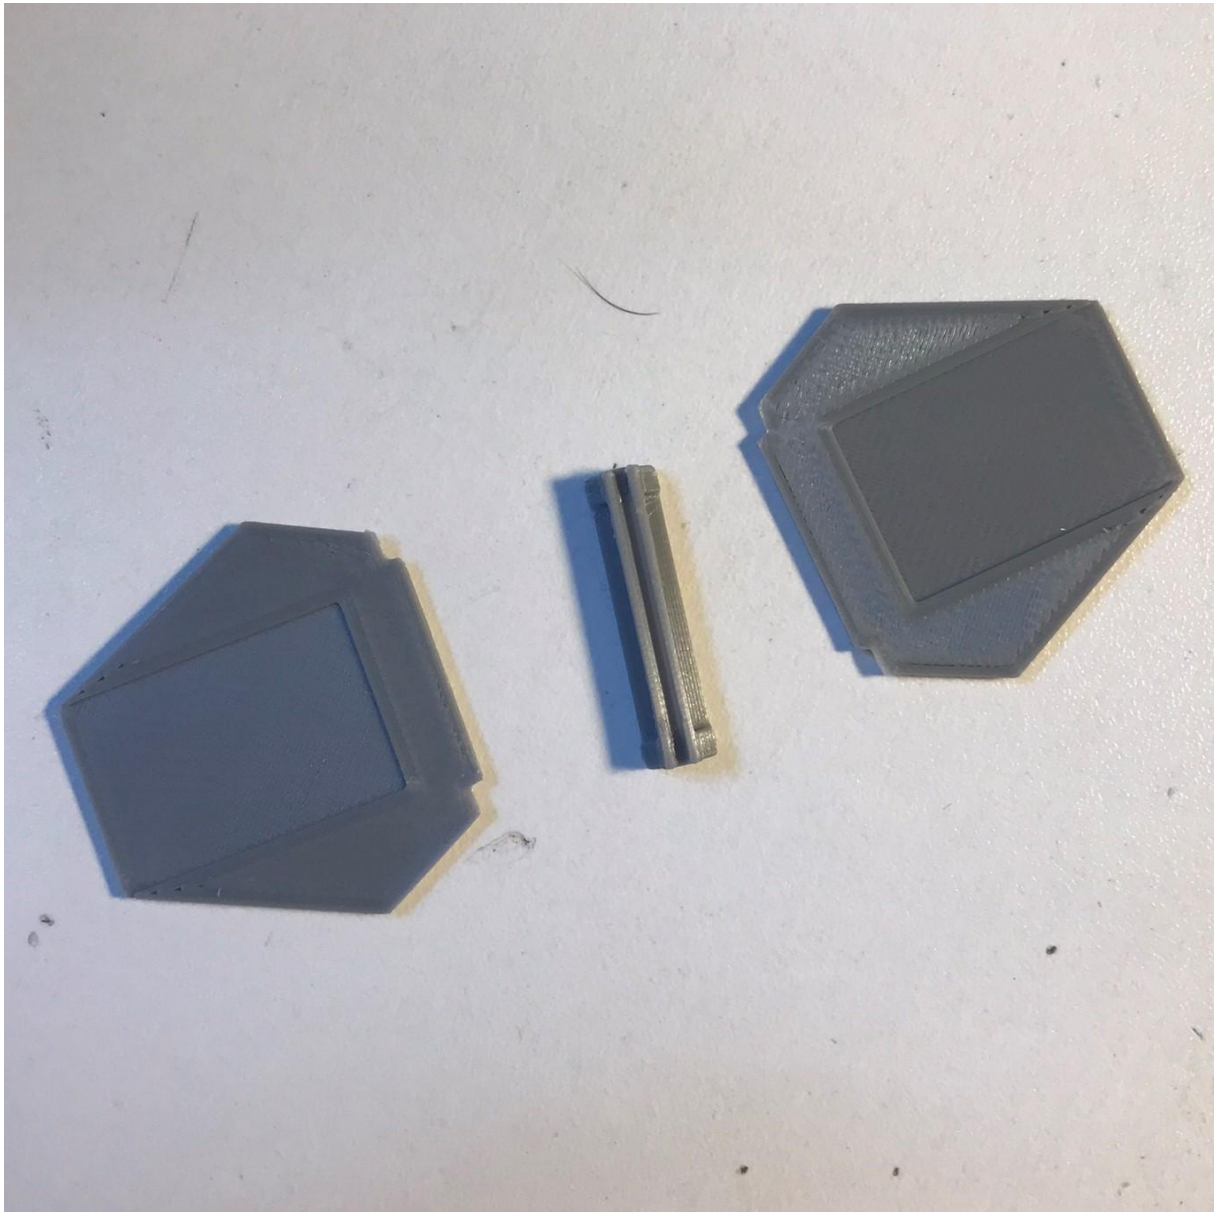

Supports: **Yes**

Material: **PLA, PETG, ABS...**

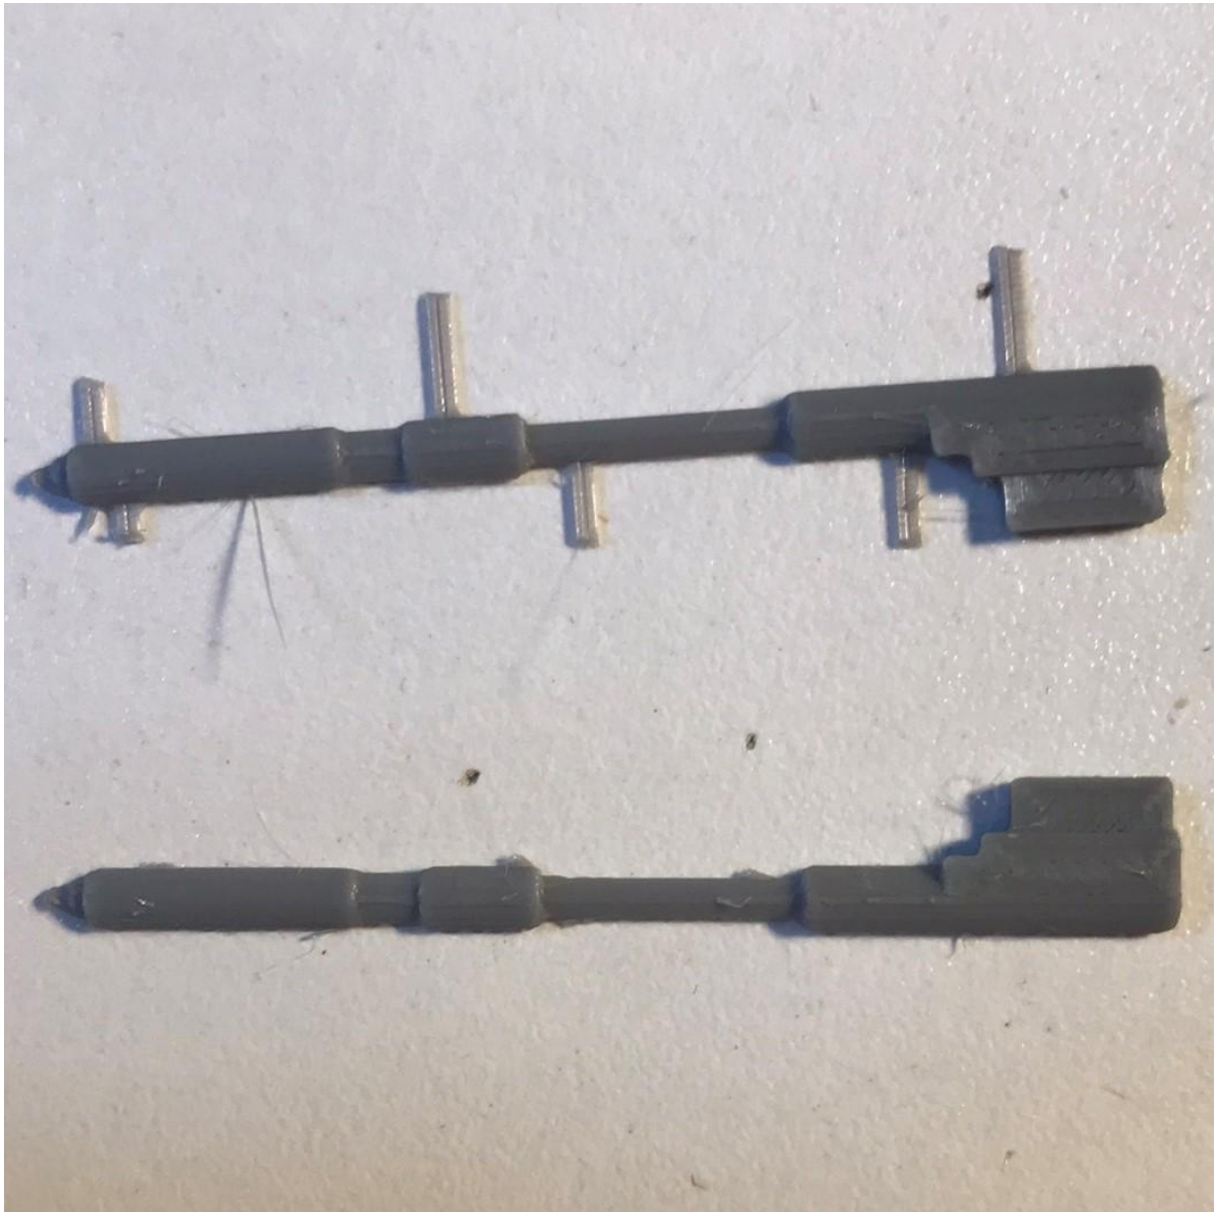

I recommend printing the first two layers more slowly.

### Assembly:

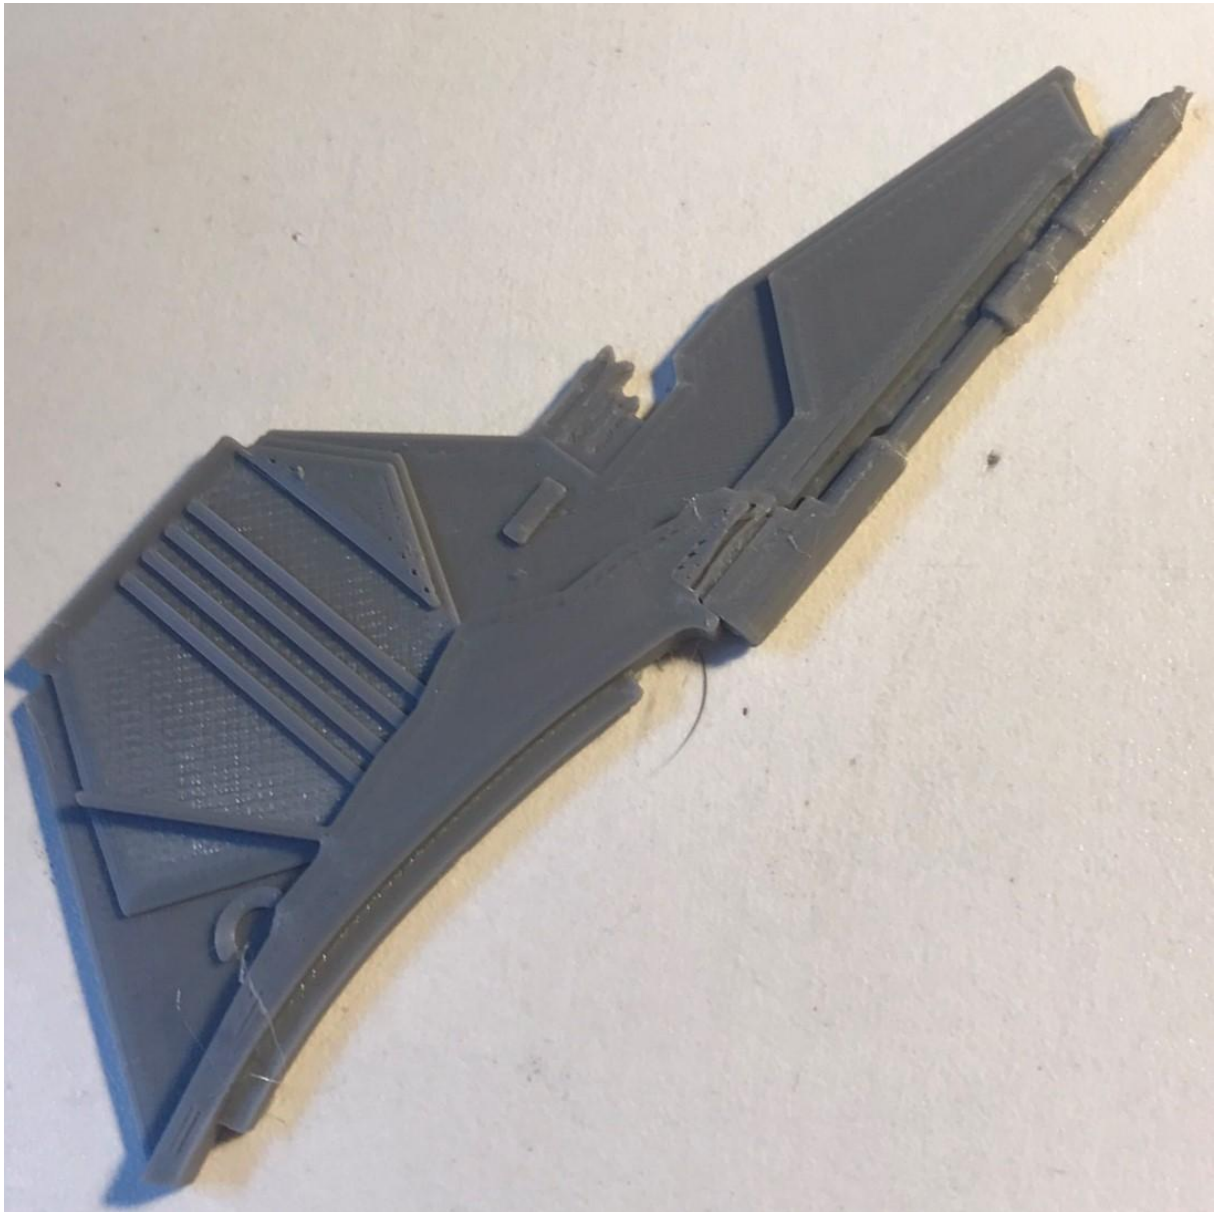

I recommend using super glue for more stability

1.Connect the wingtips to the connector

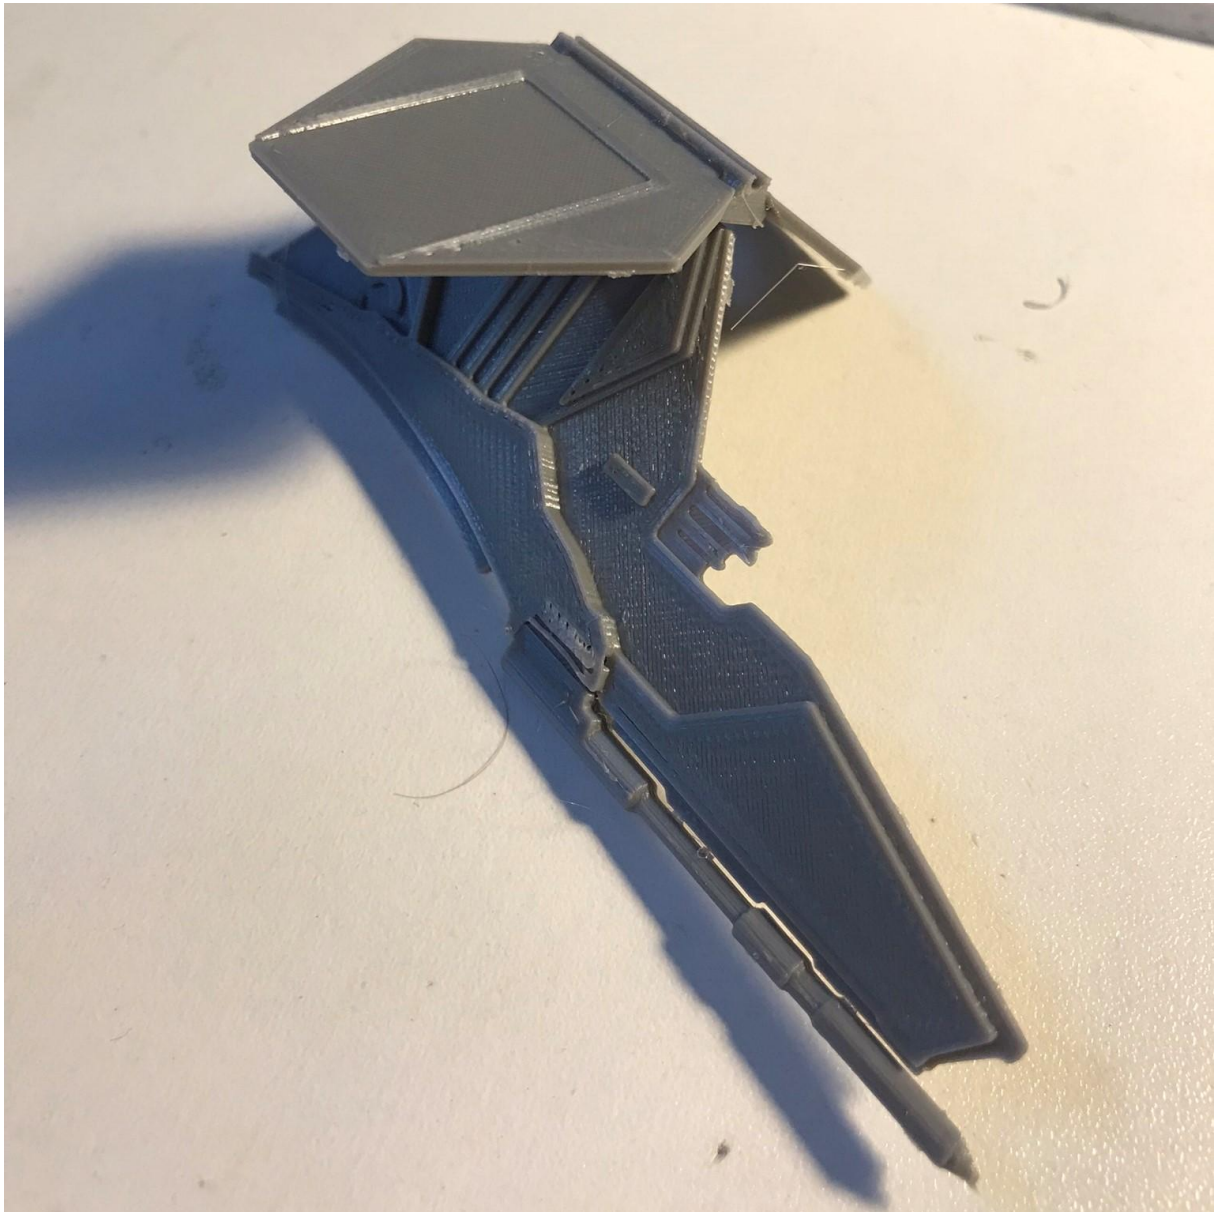

2.Connect the two parts of the weapons

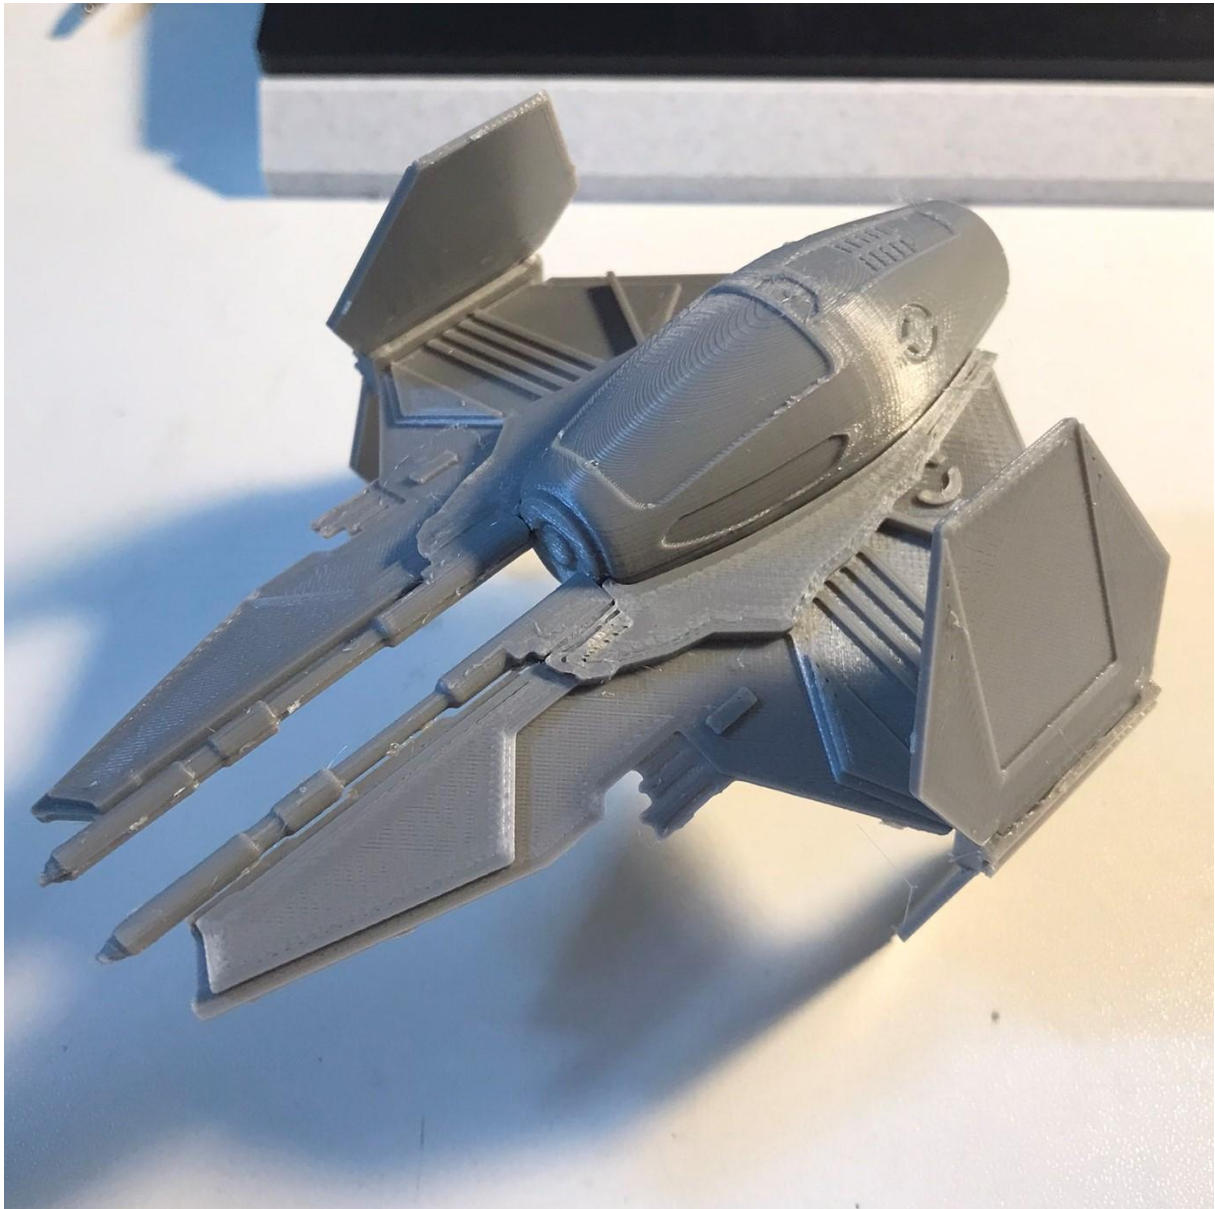

3.And put them in the pocket of the wings

4.Connect the wingtips with the wings

5.Connect the wings to the previously assembled body
