Summary

Ensure the V-Hive door stays flat on its seal under the door handle - pull the handle screws with additional magnets.

The door of my v-Hive was not 100% flat and sealed in the area under the handle, so I've remixed the original magnet holder to snap on the door handle screws.

Can be used for all kinds of 2020/4020 and similar extrusions, use M6x12 screws and 10x4mm neodyme magnets.

PETG or ABS recommended.
