updated 3. 8. 2023 | published 3. 8. 2023

Summary

Kids thought it was a cool thing to make the BB move from underneath with a magnet.

[Toys & Games](#) > [Other Toys & Games](#)

Just a holder for a magnet for the kids to use on thing like the MAZE for BB's. (of course ferrous based BB's) I made it for the magnet I had lying around so I included a blank one for you to alter to your needs. I had larger magnet around so I made it for that one but I included a blank so you can make your own hole for the magnet you might have laying around.
