## Summary

Printable Bottom frame on the SuperRacer for the Rook MK1 3d printer

[3D Printers](#) > [3D Printers - Upgrades](#)

Tags: [superracer](#) [rookmk1](#) [frame](#)

MK1 Bottomframe.stl is to be cut in slicer about 103mm when placed on the front side.

MK1 BottomframeRodsOpen.3mf is cut, but has open Rod Holes and is intended to be used with my XT60 foot which have to have a M3 heat insert for compensating for different Rod length.
