[octoprint](#)

I recently switched from octoprint to Prusa Connect and no longer needed a screen. I also wanted to go back to the original dash on my Prusa-Box. The only thing missing was the switches for lights and exhaust fans. I took the dimensions from the modular control panel and added spots for the switches. They are KCD1-101 switches available on amazon.

This remix is based on

Raspberry Pi (no Screen) panel for Prusa Box
