Summary

This funnel fits snugly on top of the 130L or 60L Sodastream canisters to make dry ice refills a little easier

Tags: [refill](#) [funnel](#) [co2](#) [soda](#) [sodastream](#) [stream](#)

I had problems with regular shaped funnels so I designed this one that won't reduce the the size of the opening much and won't fall off.

Don't pay for a new CO2 canister, re-fill what you have with dry ice from a grocer or fish market.

How much dry ice?

- 130L canister ~935 grams (up to 1000g OK)
- 60L canister ~450 grams (up to 500g OK)

Always buy more dry ice than you need since you'll lose at least 1/3 of it to sublimation. So if you are filling a 130L canister, get at least 1.5kg.

Other essential tools

- rubber mallet
- thick plastic bags

- sturdy plastic chopstick or similar dowel shaped tool to crunch the dry ice down the funnel.
